

USE OF PEACEBUILDING KNOWLEDGE / SKILLS

Outcome indicator

Indicator Phrasing

INDICATOR PHRASING: % of those trained in peacebuilding that are conducting peacebuilding activities in their communities

What is its purpose?

To assess the extent to which those trained are putting their new skills and knowledge into practice.

How to Collect and Analyse the Required Data

Best done as part of a follow up mentoring and nurturing process with those trained rather than as a one-off. Individuals should be asked to report or complete a short survey 4 to 6 months after the training. Ideally this should be repeated every 6-12 months.

Disaggregate by

Gender and age-group as standard but additional social identify markers such as faith or ethnic affiliation can also be used.

Important Comments

For peacebuilding activists trained on the 5 day conflict transformation course the usual next step would be to facilitate the community conflict transformation dialogues within their communities. However depending on context other peacebuilding activities would also count.
