

CONFLICT TRANSFORMATION ACTIVITY

Outcome indicator

Indicator Phrasing

INDICATOR PHRASING: % of activists that have initiated a Conflict Transformation activity within the last 3 months

Français: To be added later

What is its purpose?

To assess the extent to which activists have put their knowledge into practice following training and to provide an estimate of the level of peacebuilding activity taking place in communities as a result of the training.

How to Collect and Analyse the Required Data

Survey with those trained as part of follow up engagement and nurturing. This can be done by email, phone or social media or face-to-face where they are physically gathered. In discussion they should be able to describe the activities that have been initiated and, if used as part of an outcome harvesting approach, be able to list some early outcomes. Ideally supporting evidence should be provided such as photos or videos and social media posts.

Disaggregate by

Gender and age group as standard, other social identity markers as relevant
